Piscataway, New Jersey 2008

Dear Madame/Sir

The 2008 IFMAR World Championships for the Electric Track classes (1/12th & 1/10th ISTC) will be held in Bangkok, Thailand from November 08 - 16, 2008. Your company has to submit motors, batteries and/or bodies for approval previous to the IFMAR World Championships. Enclosed are details of how to obtain approval for your products for the 2008 events.

If the motors are already approved, you have no need to seek new approval; any products previously approved do not need to be resubmitted. IFMAR approves the construction only, which is the can, end bell, armature.. If you have no new motors for approval for the 2008 events, please destroy these Homologation Forms as they cannot be used for future IFMAR Electric W.C. events. If you have products not approved (or products which are significantly changed after the last approval), and you wish them to be approved for official use at the 2008 Electric Track W.C. and future IFMAR W.C. events, **you must send them for approval according to the dates mentioned in the various forms attached to this.**

By this date the samples of the products and the completed homologation form must be in my hands. ANY PRODUCT OR FORMS RECEIVED AFTER THE CLOSING DATE CANNOT BE APPROVED FOR THE 2008 ELECTRIC TRACK WORLD CHAMPIONSHIPS. Products not approved cannot be used by any competitor at the 2008 Track Electric IFMAR World Championships.

Evidence of the availability of the product should be sent to the IFMAR Treasurer

The approval procedure is very easy. If you have any questions please contact me direct at the email address above and I will assist you. The IFMAR Electric Section will look forward to receiving your products for approval BEFORE the deadline noted above.

Sincerely
Ernest N. Provetti
Electric Chairman, IFMAR

P.S. Please ensure that, if or when sending samples for homologation purposes, you state on the Customs Declaration Form "Samples Only – No Commercial Value". Please also make sure that the package you send is free of costs for the receiver. It would also be appreciated if you also notify me by email: electric.chairman@ifmar.org that your products have been posted.

BRUSCHED MOTOR HOMOLOGATION PROCEDURE

PLEASE READ THIS FIRST

The International Federation of Model Auto Racing (IFMAR) allows only approved motors and batteries to be used in its sanctioned World Championship meetings. This approval is to ensure that all competitors have equal access to the latest motors and batteries, thus ensuring wherever possible, fair racing to decide the World Champion. IFMAR makes no representation as to the quality or efficacy of the products approved. If parts of an approved motor are changed, the motor must be sent to IFMAR for re-approval.

Any manufacturer, distributor, agent or retailer may submit products for approval. Providing the products meet the specifications and requirements of the IFMAR rules in force at the time of approval, and are submitted by the closing date and meet the availability requirements of IFMAR rules, IFMAR will approve the product.

Please follow this procedure:

Complete the IFMAR Brushed Motor Homologation Form.

Prepare (1) copy of the commercial documents required (Invoices, Advice notes, etc) which show receipt of 5,000 parts and sale of 300 motors in accordance with the IFMAR Rules. **Send these documents to the address mention in the homologation forms**

Send three (3) teardown motors with the Motor Homologation Form to the address mention in the homologation forms

Send three (3) motors with a copy of the Motor Homologation Form to the IFMAR approved laboratory for checking. The laboratory is:

Bob Ingersoll
RHI Services/ Robert Ingersoll
2921 Harlee Drive
Farmers Branch, TX 75234-5007
roarrhi@tx.rr.com

PLEASE NOTE

This page of the brushed motor homologation form together with Copies of invoices, receiving notes, etc. for availability check should be sent separately ONLY to:

IFMAR Treasurer
c/o Jean-Luc RETORNAZ
PO Box 25, 2019 Route de Berre
F-13122 VENTABREN
France

If you intend to homologate more than one product please copy this page and use only one form per submitted product.

BRUSHED MOTOR HOMOLOGATION PROCEDURE

EXTRACT FROM THE IFMAR ELECTRIC TRACK RULES

4.3 MOTORS

Only IFMAR approved motors may be used. Approved motors must meet the following specifications and be commercially available four (4) months prior to the World Championship. Availability requirements must be met at the time of submittal. Submittal deadline to be four (4) months prior to that year's event to be placed on that year's list.

- 4.3.1 Manufacturers must submit motors direct to a testing laboratory, the name and address of which will be supplied, on request, by the IFMAR Electric Section Chairman. Manufacturers will be responsible to pay all laboratory fees for testing. Upon receipt of laboratory confirmation from the manufacturer to the IFMAR Electric Section Chairman that the product meets all specifications and the Chairman is satisfied that all IFMAR availability requirements have been met the product will be included on the approved products list for use at WC events.
- 4.3.2 An approved products list of motors approved for use in the World Championships must be posted on the IFMAR website and the organizer's website (if available) four (4) months prior to the event and the list shall be included in the race acknowledgement package sent to each competitor no later than two (2) months prior to the event.

BRUSHED MOTORS

Specifications: '05' sized displacements.

Can diameter to be a maximum of 36.02mm

Can length to be Maximum of 53mm measured from the mounting face of the motor to the furthest point not including solder, tabs or lead wires. Shaft diameter is .125 inch. Production Tolerances allowed. Ceramic magnets only (cobalt and rare earth magnets specifically not allowed). Current is supplied to the armature by 2 brushes.

Armature - The rotor is to have three poles with windings. Stack length without epoxy - minimum 21mm and maximum is 22.8mm. Only Copper wire is to be used for the winding.

No Split rotor is allowed. The laminations have to be one after the other without anything between. The thickness of the stack plates is $0.35\text{mm} \pm 0.05\text{mm}$, a maximum of 63 laminations to be used. The minimum stack thickness is 3.5mm.

The armature has to be permanently marked by the manufacturer, detailing the number of 'winds' and the name of the manufacturer.

A minimum of 5,000 units must be available at the time of approval. A minimum of three hundred (300) motors must have been sold to at least three (3) distributors or hobby shops or OEM's at the time of submittal. The manufacturer has to provide an address of a hobby shop or the like, that any driver who wishes to obtain these motors at the time of approval can do so.

Approved motors may be modified by re-winding, balancing, truing of commutators, epoxying, ball bearings, brushes and custom brush systems only.

No hybrid (mixing of parts from approved motors) allowed.
